🪪 PROFILE

Passionate software development student with strong experience in frontend development, skilled in JavaScript, TypeScript, React, and modern web frameworks. Experienced in building web and mobile applications from scratch with focus on responsive design, performance, SEO, and localization. Strong foundation in HTML, CSS, and JavaScript, with hands-on experience in Next.js and modern frontend architectures. Motivated to grow as a Front-End Developer Intern and eager to learn in a production environment.

🎓 EDUCATION

Bachelor of Engineering in Information and Communications Technology   01/2026 – 2030
Jyväskylä University of Applied Sciences

Full Stack Web Development Program   01/2025 – Present
Helsinki Business College

💼 PROFESSIONAL EXPERIENCE

Front-End / Full Stack Developer   08/2025 – Present | Helsinki
Freelance
- Designed the entire application from scratch including UI/UX, branding, and layouts
- Built a multilingual (7 languages) full-stack web application with admin panel, authentication (NextAuth), and email integration
- Delivered production-ready SEO optimization, responsive UI, and localization using next-intl
- Communicated directly with a non-technical client, translating business needs into technical solutions

🗀 PROJECT EXPERIENCE

Unelma Platforms   10/2025 – 12/2025
Website Redesign & E-commerce System (Team project, 4 developers)
- Contributed extensively to frontend development using React, TypeScript, Next.js, and Tailwind CSS.
- Built blogs and product pages, cart, and checkout flows with focus on usability and responsiveness.
- Developed reusable UI components and implemented Redux-based state management.
- Worked closely with Next.js architecture including server/client components and data fetching.
- Led backend development using Strapi, implemented NextAuth authentication, Stripe payments, and email confirmation flows.
- Built a Python-based chatbot using Pinecone vector database for semantic search.

School Booking Platform   09/2024 – 04/2025
- Developed a cross-platform booking system (iOS, Android, Web).
- Implemented backend using Node.js and GraphQL, fully tested and containerized with Docker.
- Configured CI/CD pipelines using GitHub Actions.

Mindfulness App   06/2025 – 07/2025
- Designed a full-stack mindfulness app with rich text editor and offline-first syncing (Dexie).
- Implemented authentication with Spring Security, JWT, and Google OAuth.
- Built data persistence with PostgreSQL.

Event Planner App   06/2025 – 07/2025
- Collaborated in an agile team to build a full-stack event planner system.
- Focused on frontend development and integration with Laravel backend APIs.
