LANGUAGES

- English (Fluent)
- Finnish (Intermediate)

PROFILE

Curious and passionate full stack developer student at Helsinki Business College with a strong backend orientation and love for clean, meaningful architecture. I began coding around four years ago and haven't stopped since. I thrive in environments where I get to design, build, connect systems — and explore the "why" behind the tech. As a creative with a background in music education, I bring discipline, empathy, and an eye for aesthetics into every development project.

PROJECTS

Booking Platform for Music Students   2024 - 2025

University of Helsinki – completed with maximum credits

- Built a full-featured booking app using Node.js, TypeScript, and GraphQL
- Designed a relational structure and handled backend logic for student-teacher scheduling
- Collaborated with end-users to ensure usability and clarity

Full Stack Open MOOC   2023-2025

Completed with maximum credits

- Covered modern web development with React, Redux, Node.js, MongoDB, GraphQL, TypeScript, testing, CI/CD
- Emphasis on deep understanding, not just code – completed all parts and exercises

EDUCATION

Full Stack Web Development React/PHP

Helsinki Business College   2025 - 2026
